J. D. LONG SEED CO.
BOULDER, COLORADO

Gay, Glamorous, Glistening GLADIOLUS

THE KING OF CUT FLOWERS, gladiolus will do well in all sections of the country. Our bulbs are carefully grown, hand dug and cleaned to protect from bruising, and packaged with care. With a minimum of attention they will reward you with a beautiful display in your garden.

CULTURE DIRECTIONS included with each order.

MINIMUM ORDER. Unlike most growers, who refuse to fill orders for less than three dollars, we welcome orders of any size, large or small. Past customers know that we like to fill orders liberally. We shall continue this policy. Since parcel post rates are much higher proportionately on small orders, the larger the order the more liberally we can fill it. If your needs are few, may we suggest pooling your order with your neighbor for our mutual benefit.

PREPAID PRICES. Unless otherwise stated, all prices in this catalog include prepaid delivery to your door.

BULB SIZES. Large bulbs, designated by letter L, measure 1¼ inches or more in diameter. Medium size (M) are from ¾ to 1¼ inches in diameter. Both sizes make fine flowers, with medium size often making spikes almost as large as those from larger bulbs.

SECOND CHOICE. As the season goes on, some kinds will be sold out. Will help us if you list a second choice in case we cannot supply all items on your order. Any substitution will be of equal or greater value.

SHIPPING TIME. Except for an occasional delay of a few days to avoid risk of freezing during unusual cold spells, orders are shipped immediately. However, if you wish us to put up your order and hold until a date you specify, we are glad to do this. Glad bulbs can not be supplied after the first of June.

Arabian Night (K & M) A deep mahogany reddish-brown with a velvety sheen and a very narrow white line on the lower petals.
(L 2—30c; 10—\$1.20) (M 2—20c; 10—80c).

Benjamin Britten (K & M) Deep lavender with fine white lines attractively penciled in throat. Tall grower; good size.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Betty Duncan (Benedict) Lovely orange, blending to a clear golden throat. Strong grower.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Buckeye Bronze (Wilson) Velvety red bronze. Its attractive color and sheen make it a favorite in this color class.
(L 2—30c; 10—\$1.20) (M 2—25c; 10—80c).

Burma (Palmer) Heavily ruffled deep rose.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Casablanca (Majeski) Large ruffled white.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Chamouny (Baerman) This light cerise rose, of velvety texture, has florets edged with silver. Opens up to ten florets at a time on tall straight stalks. Bright, flashy and appealing.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Columbia (Roberts) Similar to the older variety Corona. Creamy white with a rose pink "halo" around the petal edges. Opens 6 to 8 florets on slender, straight spikes.
(L 2—30c; 10—\$1.20) (M 2—25c; 10—80c).

Dark David (Morgan) Beautiful smooth, rich, dark maroon. One of the best of the dark reds. Opens 6 or 7 very large, slightly frilled florets on tall fine spikes.
(L 20c each; 10—\$1.50)
(M 15c each; 10—\$1.00)

Dieppe (Hassall) Deep salmon red with a darker blotch in the throat. The attractive florets have a very distinctive shape.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Elizabeth the Queen (White) This large, lovely ruffled lavender is one of the most popular glads grown. Opens 7 or 8 large florets at a time of handsome form and beautiful color.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Evangeline (Palmer) Very light pink with rose cast, blending into a creamy throat. Opens up to 10 beautifully ruffled florets on a long, heavy flower head.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Fiat Lux (K & M) Pure golden yellow of medium shade that opens up 8 to 10 attractive florets on tall upright spikes.
(L 2—30c; 10—\$1.20) (M 2—25c; 10—80c).

Firebrand (Butt) Fine medium shade of red. Slightly darker in throat with white lines on lower petals. Opens eight or more at a time with many other florets showing color.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Florence Nightingale (Harris) A fine new white. Opens up to eight blooms on a tall, straight spike.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—70c).

Gold (Marshall) A new wonderful rich yellow variety that has become a sensation in its class. Strong, healthy grower.
(L 20c each; 10—\$1.50)
(M 15c each; 10—\$1.00).

Green Light (Pfitzer) Light yellow cream bordering on chartreuse. Buds have a greenish gloss.
(L 2—30c; 10—\$1.30) (M 2—25c; 10—90c).

Heirloom (Klein) Huge clear orchid lavender with no flecking. White throat. One of the most popular.
(L 20c each; 10—\$1.50)
(M 15c each; 10—\$1.00).

Karen (Mazur) Rosy purple with a very prominent cream throat. Florets are round, slightly waved and well placed. An exceptionally attractive glad.
(L 25c each) (M 15c each).

King David (Carlson) Deep royal purple with rich red velvet throat. Very ruffled, winged and fluted florets with picotee edging.
(L 15c each; 10—\$1.25)
(M 10c each; 10—90c).

King Lear (Palmer) Large reddish-purple. Its distinctive, pointed blooms set it apart from other glads.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Lady Jane (Lake) Here's a glad we like very much. Florets are clear deep cream with yellow lip petals, evenly spaced on sturdy spikes.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—70c).

Leif Erikson (K & M) An impressive large creamy white. Opens 8 to 10 wide open flowers with many more buds showing color.
(L 20c each; 10—\$1.50)
(M 15c each; 10—\$1.00).

Maid of Orleans (Pfitzer) Tall pure white with slightly creamy accent in throat.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—65c).

Margaret Fulton Early salmon pink with rounded florets on sturdy spikes.
(L 2—25c; 10—\$1.00) (M 3—25c; 10—65c).

Miss Holland (K&M) Lovely light clear pink. Large florets on tall, straight spike.
(L 2—25c; 10—\$1.10).

Miss Wisconsin (Kreuger) Deep lavender rose. A strong and pleasing color.
(L 2—25c; 10—90c) (M 4—25c; 10—60c).

ALL-AMERICA GLADIOLUS

Good news this year is the elevation of two more outstanding gladiolus to All-American rank. Caribbean and Maytime join the 1956 winners, Royal Stewart and Appleblossom, to make available four top-notch varieties at new low prices.

Prices are 50c each; 6 for \$2.50 or 12 for \$5.00, and you may combine varieties in order to take advantage of the lower prices for 6 or more. Bulbs are large size only.

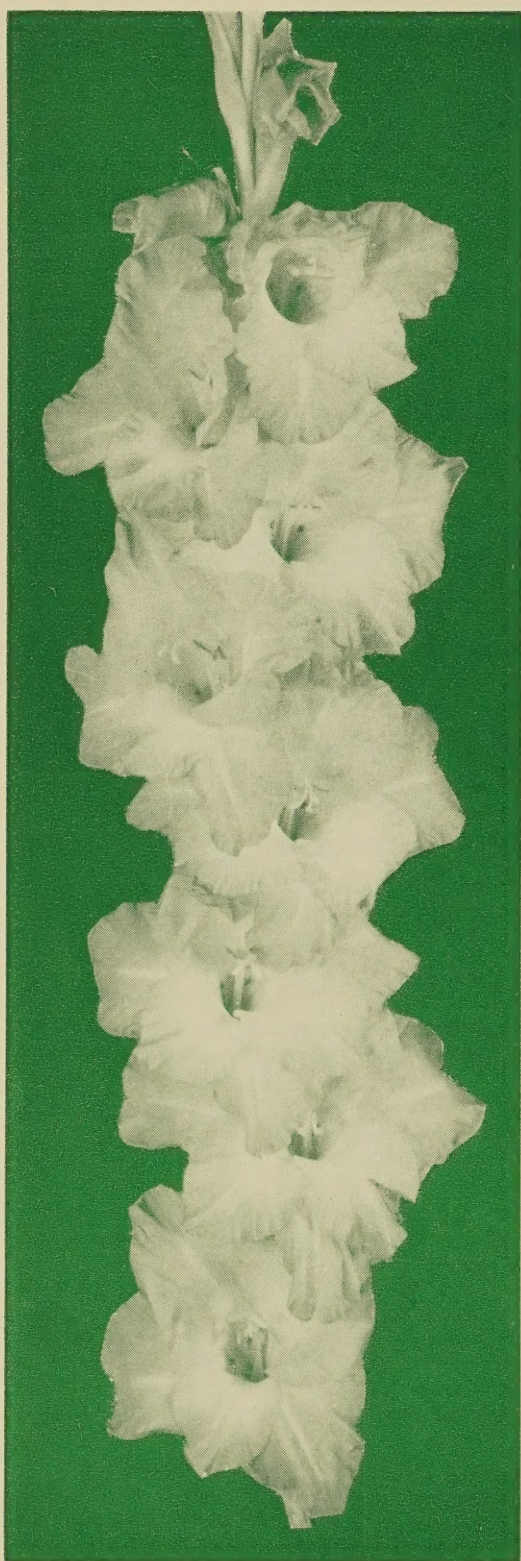

All four glads are patented, with the right to reproduce for re-sale or cut flower purposes reserved.

CARIBBEAN (Baerman-Fischer, 1957) The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. It will open from 9 to 11 precisely styled florets at one time in formal, double row placement. Extremely vigorous and a top performer with all, well-proportioned spikes. It is the first distinctly ruffled blue-violet gladiolus.

MAYTIME (Baerman-Fischer, 1957) The graceful ruffled deep pure pink florets with their contrasty large white throats make this new glad a pleasure to behold. A gladiolus of good height, readily opening 8 to 10 florets on spikes up to five and one-half feet tall. A husky grower, you will love MAYTIME for its ribbon of color, sheen of the petals and ease of growth. Ideal for either cutting or exhibition.

APPLEBLOSSOM (Baerman-Fischer, 1956) A gladiolus of the utmost delicacy of coloring, the predominating hue being white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. A vigorous, easy grower.

ROYAL STEWART (Pommert, 1956) A truly remarkable new gladiolus variety. The lightly ruffled florets are five inches in diameter and are of good substance. They are clear, light red and the long flower heads frequently carry up to twelve flowers open at one time. Growth is vigorous and healthy, with the total height of the plant running about five feet.

MAYTIME

Myrna Fay (Lines) Excellent medium shade of lavender. A shade or two more to the red side than Elizabeth the Queen. Blooms early. (L 2—25c; 10—\$1.10).

Noweta Rose (Fischer) Deep lavender rose capable of sensational spikes. Sometimes opens as many as 12 florets at one time. (L 2—30c; 10—\$1.20).

Pactolus (K & M) Apricot-cream with orange-red blotches on the lower petals. Florets perfectly placed on straight stems of medium height. One of the most attractive novelties from Holland. (L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Pandora (B. Palmer) Beautifully clear soft geranium-pink with somewhat darker lines in the throat. Straight, sturdy spikes opening up to 10 florets at a time. Remains one of our favorites. (L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Patrician (Scheer) Lovely medium lavender. Opens up to seven very large recurved florets on a strong straight spike with excellent placement. Vigorous grower. (L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Patrol (Palmer) A light apricot with a yellow throat. Will open 10 or more florets on a tall spike. (L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Phantom Beauty (Bastian) Clear light pink. Opens up to 10 blooms at a time. Verv fine. (L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Picardy (Palmer) Soft shrimp pink with rose feather in throat. Still popular, but we like Spic & Span better. (L 2—25c; 10—\$1.10).

Poinsettia (Weeks) Pure light spectrum red. Slightly ruffled with six to eight florets open on a tall spike. An outstanding variety. (L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Polynesie (K & M) Vigorous growing pure salmon, deeper than Picardy. Large round florets are slightly ruffled. (L 15c ea.; 10—\$1.25) (M 2—20c; 10—80c).

Red Charm (Butt) Very popular medium red. Consistently makes fine spikes with up to eight well placed blooms open at once. (L 2—25c; 10—\$1.00) (M 3—25c; 10—70c).

Rosa Van Lima (Pfitzer) Lovely pure clear pink. An early bloomer, and almost always the first to break through ground in spring. (L 2—25c; 10—\$1.00) (M 3—25c; 10—60c).

Ruffled Ebony (Fischer) New black red that is as dark as any, but with more life to the color. Extremely ruffled with a silken sheen.
(L 25c each) (M 15c each).

Sans Souci (K & M) Rich, glowing scarlet. Florets are of heavy texture and well placed on graceful straight spikes. This new variety from Holland is one of the best reds we have ever grown.

(L 20c each; 10—\$1.50)

(M 15c each; 10—\$1.00).

Sheherezade (K&M) Creamy pink with a strawberry blotch in the throat. 6 to 8 large florets of heavy texture open on a tall upright stem.
(L 2—25c; 10—\$1.10) (M 3—25c; 10—70c).

Sherwood (Pruitt) One of the best of the new purple glads. Opens seven lightly ruffled blooms on tall spike.

(L 2—35c; 10—\$1.20) (M 3—30c; 10—80c).

Snow Princess (Pfitzer) Favorite white. Tall, husky grower.

(L 2—25c; 10—\$1.00) (M 3—25c; 10—60c).

Spic & Span (Carlson) The most popular glad grown. this deep ruffled pink has color and growth habits hard to beat. Blue ribbon winner at shows throughout the country.

(L 2—25c; 10—\$1.10) (M 3—25c; 10—75c).

Strawberry Peach (Salbach) Bright orange pink with soft scarlet blotch and feather.

(L 2—30c; 10—\$1.20) (M 2—25c; 10—80c).

White Gold (Scheer) Giant cream blending to gold in throat. One of the most dependable varieties we have ever grown.

(L 2—25c; 10—\$1.00) (M 3—25c; 10—60c).

Yellow Herald (Pfitzer) Lightly ruffled yellow with carmine throat lines. A very reliable and pleasing variety.

(L 2—25c; 10—\$1.10) (M 3—25c; 10—70c).

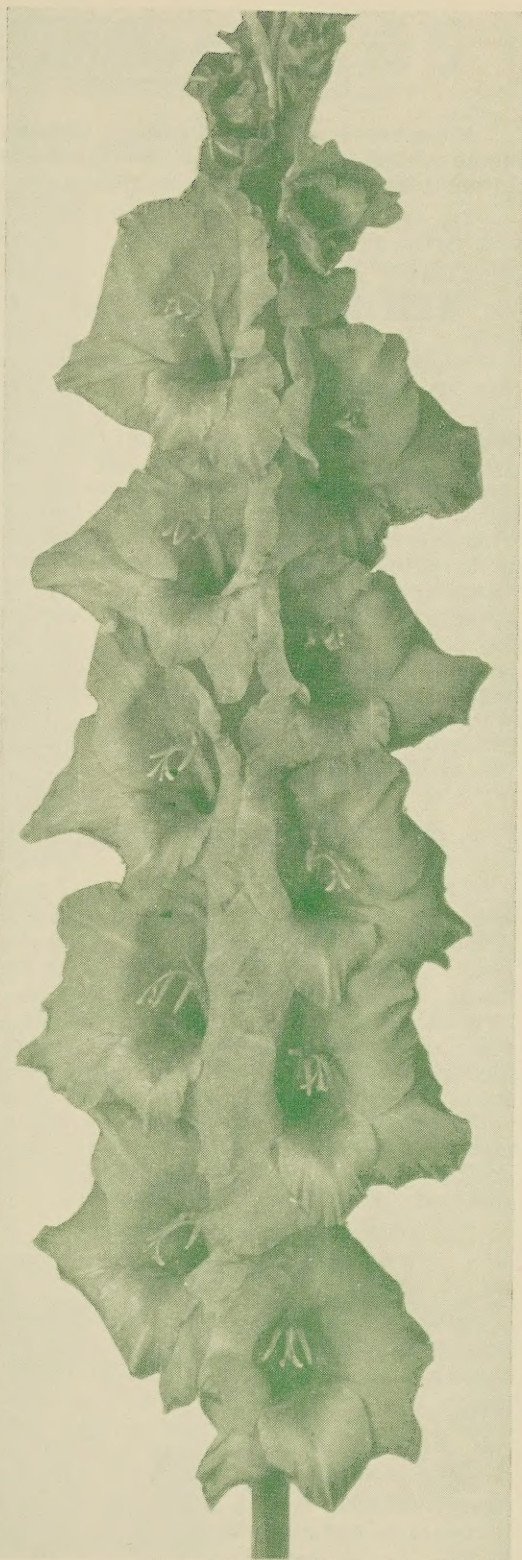

Exhibition Mixed A fine assortment of mixed colors.

(L 10—90c; 25—\$1.75; 100—\$6.50).

(M 10—55c; 25—\$1.10; 100—\$4.25).

Second Choice, Please

As the season goes on, some kinds will be sold out. Will help us if you list a second choice in case we cannot supply all items on your order. Thanks.

ROYAL STEWART

ALL-AMERICA SELECTIONS

For many years, in trial gardens throughout the country, hundreds of flowers are tested in the All-America selections. Some years the discriminating judges fail to find a single flower that measures up to the high standards necessary for a winner.

Two outstanding petunias and a new phlox captured the attention of the judges this year in the flower trials. They are:

RED SATIN PETUNIA

RED SATIN PETUNIA Displays incredibly vivid and shining scarlet-red flowers. This marvelous red which so captivated the judges in the trials is strong and enduring everywhere. Heat and sunshine fail to fade the color and difficult growing conditions fail to prevent the hybrid multiflora plants from blooming freely. The plants attain a 10 to 12 inch globe-shaped form and then maintain that size and character right through the season, making a perfect vehicle for the profusion of 2½ to 3 inch blooms. Red Satin is admirably suited to low beds of dazzling color, to create a bright band of scarlet for borders or edgings, or for well-behaved, generously blooming pot plants. Pkt. of 100 seeds 50c.

GLITTERS PETUNIA

GLITTERS PETUNIA Brings us the first and only scarlet and white bicolor. The striped or starred patterns in red and white stand out in showy contrast with other petunias. This is a true hybrid and very uniform in the desirable dwarf, compact bedding type. It covers itself with striking two inch blooms from early spring until killing frosts. You will find this novelty from Japan really glamorous for low cut-flower arrangements as well as for pots, boxes, bedding, edging walks, drives, borders and for rock and wall gardens. Pkt. of 100 seeds 50c.

TWINKLE PHLOX

TWINKLE PHLOX A striking novelty from Holland in a wide array of colors. The only dwarf star phlox, it is just as full flowering as the 15 to 18 inch taller type. The dwarf, compact 6 inch plants are covered with a mass of star-shaped bi-colored flowers in large umbels of bloom. Flower colors are nicely balanced, with a good percentage of salmon, rose and pink shades that are seldom seen in the tall star phlox. Twinkle makes a delightful new edging and bedding plant, and may be sown directly in its permanent location. Pkt. 25c.

Columbine McKana Giant

An Earlier All-America

See page 9.

CHAMPION RADISH

CHAMPION RADISH So beautiful is this new All-America radish that we are not embarrassed to mention it on the same page as the award winning flowers. It is a clear bright scarlet, of round form, with a slim taproot. It will grow and remain crisp and firm to the diameter of a silver dollar. The quality is of the best and it stands a long time and to large size without getting pithy. May be planted very early, while ground is cold, and still makes good roots and tops. Its rich scarlet color and long standing advantage make it an all purpose, beautiful crisp radish. Pkt. 25c.

LONG'S FLOWER SEEDS

ASTERS

All Asters, except Powderpuffs, uniformly priced at: Pkt. 10c; $\frac{1}{8}$ oz. 50c; $\frac{1}{4}$ oz. 90c.

Powderpuffs An exciting new development in Aster culture. Plants grow about 24 inches high with as many as 20 blooms on a single plant. Characteristic upright growth habit permits the entire plant to be cut as one bunch. Very early. See color illustration on the inside back cover. Pkt. 25c.

Princess Flowers three inches in diameter have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals. Plants tall and branching.

Iceberg Similar to Hanson. Crisp and tender. Fine for home gardens.

Prize Head Leaves crimped; tinged brownish-red. Early.

New York Also called Los Angeles, Wonderful, Mountain Iceberg, and Western Iceberg. Leading heading lettuce for market. Pkt. 10c; oz. 30c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.40.

Great Lakes All-American Bronze Medal Winner. A tight-heading, sure-to-head variety for home and market. Produces fine large heads, well rounded, very solid. Especially resistant to tipburn. Stands the longest of any lettuce without going to seed. Can be used as leaf lettuce at all stages of growth. The attractive crimped leaves are tender and delicious. Fills a long felt want for both back yard gardeners and commercial growers. The most certain to head of all large luscious varieties, often under most adverse condition, and in hot weather. Heads best of course in cooler months. Resistant to tipburn. The thick large leaves fold well over the head. Unlike most kinds, Great Lakes is very slow to run to seed. Pkt. 10c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.80; ½ lb. \$3.25; lb. \$6.00.

To Make Head Lettuce Head

Lettuce will seldom head in hot weather, unless grown in shade. It is a cool weather plant, doing best very early in spring, or late in fall, as head lettuce.

Sowing head lettuce seed late in fall, just before ground freezes, is one good way to get an early start the next spring. Very early spring sowing—March or early April—is good.

Bear in mind that the ground should be good and rich, and that the plants should be thinned or transplanted to 6 to 10 inches apart. Then they should be hoed often, the oftener the better. You can't expect to pluck large solid heads of lettuce from a bed in which the plants are thick.

WATER MELONS

Helpful Hints

ALYSSUM. The favorite border plant. Easy to grow. Sow where plants are wanted for beds, edgings or borders. Cover $\frac{1}{4}$ inch. Thin to 5 to 6 inches.

ASTER. Not necessary to start the plants inside. Sow outdoors from real early spring to well into May. Sow in beds or rows. Cover one-fourth inch. Thin or transplant to rows 16 to 20 inches apart, 6 to 10 inches in row.

The improved wilt resistant strains overcome most Aster troubles, except the "yellows", which is caused by tiny hoppers that carry disease from one plant to another. Growing under cloth prevents yellows. Asters thrive best in a little shade. East side of a building seems to suit them fine.

BABY'S BREATH. (*Gypsophila*). The annual (often called Angel's Breath), white or rose, comes quickly from seed sown in garden, blooming in a few months. Good idea to make several sowings so as to use all summer and fall with bouquets of other flowers.

The perennial is white. It blooms second year from seed. A root will last for years, forming a large clump in time. Double best for drying. Sow very thin and cover lightly. Thin to a few inches apart. As the roots increase in size, thin still more. If want all double, pull out the singles. Roots easily transplanted also. (Double never comes all double from seed.)

BACHELOR'S BUTTON. They grow like weeds, yet the improved sorts are delightful for garden display or as cut flowers. Florists use lots of the double sorts for bouquets and designs. Plant the double varieties. Nothing much to it—just sow the seed as you would aster seed and thin to 6 or 8 inches.

BALSAM. (Touch-Me-Not.) Children's delight. Sow May, $\frac{1}{2}$ in. deep. Thin to 8 inches.

CALENDULA (Scotch Marigold). Another "easy-to-grow" flower. Sow early, medium or late in spring. Handle about same as asters. Stands lots of frosts, ice and snow. "It's a glutton for punishment."

CALIFORNIA POPPY (*Eschscholtzia*). Not easy to transplant, though can be done when plants real small. Better sow where wanted. Very hardy. Cover lightly, hardly one-fourth inch. Thin to 5 or 6 inches each way.

CALLIOPSIS. May be sown quite early outdoors. Cover $\frac{1}{2}$ inch. Thin to 10 inches.

CLARKIA. Lovely carnation-like flowers, resembling the flowering almond. Charming in garden, and exquisite for indoor bouquets. Buds will open after cutting. Partial shade best. Thin to 5 to 7 inches.

COLUMBINES. Bloom second year from seed. Like loamy soil, and partial shade best. Slow to germinate, especially the Rocky Mountain strain. Germinate best if sown very early spring, or just before ground freezes in fall. Thin to 6 to 8 inches.

COSMOS. Being tall, it should be grown as a background, or in center of bed. The early large-flowered kind is good. The newer "Sensation" strain still better. Sow April and May. Cover $\frac{1}{2}$ inch. Thin to 10 inches.

DELPHINIUM. Often exasperatingly slow to germinate. Hard to start in hot weather. Loves cooler weather. Follow suggestions given for Columbines. Cover seed about half inch. Avoid letting water stand on crowns of plants. Do not sprinkle plants late in day or evenings. Fine sulphur dust checks mildew.

FOUR O'CLOCK. Sow from middle of April to last of June. Cover one inch. Thin to 8 or 10 inches. Try this for a hedge if need something of the sort in a hurry.

GOSETIA. Thrives best in cool moist soil, and some shade. Nice for cutting. Buds open along stem much like the *Gladolus*. Thin to 7 or 8 inches.

GOURDS. Plant when and as you plant cucumbers and melons. Tender. Wait till danger from frosts over. When matured and dry, give an even coat of shellac or varnish, if wish to keep as is for pets.

ICELAND POPPY. Sow where wanted, as hard to transplant, except when plants very small. Take plenty soil with roots if move them. Early spring or very late fall best time to sow, though with care can be started any time in summer. Danger of sun killing just as come up. Prevent loss by using temporary light cloth shade over bed or row till plants get a "toe holt." Cover seed lightly. Thin to 4 to 6 inches.

LARKSPUR. Still another that is a bit slow to come up, and likes early cool spring weather best, for germinating. Cover little less than half inch. Thin to 8 or 10 inches.

MARIGOLD. These old favorites of grandmother's garden are still going strong, increasing in popularity with the improvement of the strains of both the tall and dwarf types. Tall sorts should be given plenty of room, because they branch freely. Should have at least a foot of space to the plant. More, still better. Dwarf plants should be thinned or transplanted to about 6 inches apart. Sow seed any time in spring after soil is warm. Cover one-third inch.

MEXICAN FIRE BUSH (*Kochi*). A few plants well placed, or a hedge of them, are effective. Turns red in fall. Grows like a weed. Give each plant 18 to 24 inches at final thinning. **Warning.** In a few sections, this gets out of bounds and becomes a pest.

MORNING GLORY. The old common kinds easy to germinate. But some of the new Mammoth kinds rather stubborn. Soaking seed in lukewarm water 12 to 24 hours helps. Another way is to chip off a little of the shell or rub seed on sand paper or cement wall to grind off a spot in shell. The main idea is to let moisture in, and yet not damage the "meat" especially the ends. Sow after ground warms up.

NASTURTIUM. So easy to grow that not much need be said. The new double sorts now used almost exclusively. Double kinds not like a rose, but often semi-double.

PETUNIA. Seed so fine that you are likely to sow too thick. Also, to cover too deep. Barely cover seed by sifting soil or sand over the seed. Press down with board after sowing. Cover with thin cloth till plants just peep through. Be careful. Watch daily. Bloom soon from seed sown outdoors. Give each plant 6 to 8 inches.

PHLOX DRUMMONDI. Annual, not the perennial that grows from root divisions. May be sown early in spring. Seed slow to germinate. Have patience, and don't neglect. See that they have moisture daily. Sow thinly in rows one foot apart. Cover one-fourth inch. Thin to 4 inches.

PORTULACCA. Don't sow till weather plenty warm, as likes HOT weather. Low growing and lovely for certain locations.

SALPIGLOSSIS (Velvet Trumpet). Will be grown much more extensively when more people learn to know it. Good idea to start indoors or in hotbeds, then transplant. But may be sown in the open when ground is warm. Cover one-fourth inch or less. A little slow to come up. Thin to 6 or 8 inches.

SNAPDRAGON. The improved Rust-Resistant strains make this always popular flower even more desirable. Seed germinates easier, plants more vigorous and have cleaner foliage, flowers large and lovely. Blooms first year from seed, and with a little protection usually lives over winter outdoors, blooming early the next year.

Lawn Grass Seed

ABOUT OUR IRIS:-

We are among the largest growers of fine Iris in the world. Every year we add new varieties to our already wonderful stock of breath-taking beauties.

We plan to mail this year's Iris catalog about the first of May. If you have purchased Iris from us within the past two years, you will automatically receive a copy. If you have not bought Iris from us within that time, and if you should like to have a copy, please accompany your request with ten cents in coin or stamps to help partially on handling and postage. The catalog itself costs us several times this amount.

Prices of many of the newer and finer varieties will be reduced this year, with selections available to fit any pocketbook.

Summer and fall is the ideal time for transplanting Iris. We start digging and shipping right after the Fourth of July. From then until November we ship to all parts of the United States. No spring shipments.
